Mark Adamik

PhD student in Artificial Intelligence

m.adamik@vu.nl

+31 06 448 99 652 / +45 91942535

Work experience

Aalborg Universyity (AAU), Denmark

2020 - 2021 Student Research Assistant

Human-Robot Interaction Lab (2020 Sept. - 2021 May)

Developing a guiding algorithm for a Pepper humanoid robot, applying Inverse Reinforcement Learning.

Drone Research Lab (2020 Febr. - 2021 April)

Developing a flight controller for a quadcopter, using an FPGA-based custom processor. Collaboration with Danish Technical University (DTU).

Honda Research Institute (HRI), Japan

2020 Internship (2020 Sept. - 2020 Dec.)

Working on a knowledge base and reasoning system for a tabletop social robot using Natural Language Processing and Natural Language Understanding.

Centrica Energy Trading A/S, Denmark

2018 - 2020 Student Assistant

Aiding traders at day-to-day operations, developing tools and automating processes (VBA, Python)

Other experiences

Volunteering

- Japan (organic farm & restaurant)
- Nepal (orphanage & dog shelter)
- Netherlands (working with homeless people during 3 years of my of PhD)
- Denmark (student mentor at AAU)

Language skills

- Hungarian (native)
- English (fluent)
- Danish (intermediate)

Education

Vrije Universiteit Amsterdam (VU), The Netherlands

2021-2025 PhD in Artificial Intelligence

The main topic of the PhD is applying a combination of symbolic and sub-symbolic AI methods (also called neuro-symbolic methods) to enhance robot perception by providing background information.

Topics:
- Ontology engineering, knowledge representation and reasoning
- Deep learning with a focus on computer vision
- Robotic software engineering

Teaching duties involved lecturing at the Introduction to Robotics course as well as supervising MSc and BSc students

Aalborg Universyity (AAU), Denmark

2015-2021 Robotics BSc + MSc

Studying programming, computer vision and control methods with a focus on social robotics and applications of Deep Reinforcement Learning methods.

Main topics of interest:

- Natural Language Processing
- Deep Reinforcement Learning
- Social Robotics

National University of Public Service (NKE), Hungary

2011-2015 Military Leadership BSc (discontinued)

Studying and working as a cadet at the Hungarian Defence Forces, Ludovika Batallion. Discontinued due to shifts in interest.

Skills acquired:

- Leadership (platoon & squad leader)
- Teamwork
- Self-discipline and accountability

Programming skills

Python	● ● ● ●
C / C++	● ● ●
Matlab	● ● ●
VBA	● ● ●
